

Open Innovation platform for diagnostic imaging

Mayank Mohun , Siemens Healthineers, Forchheim, Germany

Abstract:

One of the Sustainable Development Goals is 'Good Health and Well-Being', and, in a way, this one Goal touches almost every other Goal. We, in the Healthcare industry, are privileged to contribute to this goal and what better way than, doing it TOGETHER.

With this in mind, we are creating a digital health ecosystem and enabling smart use of health-related data to provide an open and secured environment for a wide range of healthcare stakeholders to share, access, and analyze data to enable better diagnosis and patient outcomes.

The Digital Marketplace™ and OpenApps™ are a platform for connecting the doctor with an ever-growing portfolio of applications from solution partners and Siemens Healthineers, covering clinical, operational, and financial functions in healthcare delivery.
